German beginner

## WORK EXPERIENCE

### INKSZE

Owner — Feb, 2014 - present

Inksze is a 1-person company creating modern web pages. During 4 years-long history I was responsible for complex cooperation with customers from many sectors e.g. telecommunication, culture, consulting, NGO etc. Almost every project was designed and implemented by me.

### FUTURE PROCESSING ↗

Websites Team Leader — Jan, 2017 - Now

As a Team Leader I am responsible for organizing the work of team consisting of developers, designers and testers using the scrum methodology. The team works on internal websites using fresh frontend tools. From time to time I also design and develop modern websites and web applications.

Lead front-end developer — Aug, 2014 - Dec, 2016

I was managing team of 5 front-end developers using scrum methodology. I was responsible for molding the strategy of front end development practices including the choice of tools, standards and methods used within our team. I am also implementing high-end, modern webpages.

Senior graphic designer & front-end developer — May, 2011 - Aug, 2014

I was responsible for designing high-quality and responsive webpages and for implementation of projects made by other designers. Also I designed tens of desktop, mobile and embedded applications.

### POSITIVE POWER

Graphic designer — Oct, 2009 - May, 2011

I was responsible for designing high-quality webpages and carrying about implementation by developers team. What is more after a year I was responsible for training two interns.

## KEY SKILLS AND COMPETENCIES

Proven experience in design high-quality modern websites and web apps.  
Proven track record in front-end design and development using HTML5, CSS3 and JS.  
Technical Skills: Vue.js + Vuex, REST, HTML5 APIs, SCSS, Gulp, Adobe Creative Cloud.  
Experience of ES6, AMP HTML, PHP, MySQL, GIT, Jira.  
Experience in managing a small, interdisciplinary team using scrum methodology.

## MOTTO

Do... or do not.  
There is no try.

Master Yoda

## INTERESTS

Modern web  
technologies

Bushcraft

Budget travelling

Classic horror movies

Star Wars

Craft beer

## SOME OF MY LATEST WORK

### BETTER FUTURE ↗

April 2018

Better Future is a new content platform referring to the subject of AI and Machine Learning. The SPA is powered by Vue.js framework, content is delivered by Directus CMS. Platform is fully designed and implemented by me. The look & feel of page were the main goal. We did it!

### FP SPACE ↗

November 2017

FP Space is consortium of three organisations from Silesia (Poland) supporting the space sector. The platform has an informational and recruitment function. Front of the application is powered by Vue.js framework and Three.js library. Content is provided by WordPress (using WP REST API). It was designed by me and executed in cooperation with other team member.

### SAILVENTURE ↗

October 2017

SailVenture is small company from Cracow organizing amazing yacht cruises on the south of Europe. This tiny website, powered by WordPress CMS, allows users to find some informations about company and book a cruise. I made full Corporate Identity for the company (includes few versions of logo) and whole website.

### FUTURE PROCESSING ↗

September 2016

The corporate website of Future Processing makes a complex platform powered by WordPress CMS. There are many types of content corresponding to many groups of people. The page consists of static pages, blogs, job offers, landing pages and other posts. It is connected with recruitment extranet, and facebook application. Huge part of page is designed and developed by me however, over the course of two years, many developers have gone through the project.
